Pretty Disgusting!

Remember, Marty has already made his deal with the government. He will be on the witness stand testifying against me in the event of a trial. He may have slowed down a little bit with his selling of updated software hard drives, but he definitely did not stop.

VIN: 4JGCB65E76A006939
Model Type: 251 R-Class
Model Year: 2006
Engine Type: R350 4MATIC 251.165 272.967
Trans Type: 722.9 6 Speed Automatic Electronic
Mileage: 183103
Category: Engine
Area - DTC Codes (engine)
Malfunction - SDS wont connect to car
Condition - always

History - Just swapped out hard drive with new SDS from LMV.

-----Original-----

I am trying to connect the SDS to this R class but it stops and says diagnostic multiplexer cannot initialize. I can connect the SDS to the ML I also have here and it connects to it just fine. I have also used a regular OBD2 scanner and it does work on the R class to read ecu faults. We just updated the software via a new hard drive from LMV and I am wondering if this is a software setup issue before I charge the customer for diagnostics.

Thanks,

Model Type: 209 CLK
Model Year: 2007
Engine Type: 272 6-cyl V-6
Trans Type: 722.6 - Automatic Electronic 5-Speed
Mileage: 108570
Area - Mechanical

History - None

-----Update-----
ok sent to have the timing and shaft replaced.

-----Original-----
had check engine light on. scan and see has 1200,1208,(p0016,p0017)for constant adjustment of inlet camshaft right bank, clear and comes right back. I think this need to have camshaft timing check for being out of time first am correct. keeps setting fault sitting in the shop without driving...

also, Marty, have my new hard drive install ready for to log on..
